T8 LED 8' DOUBLE ENDED BYPASS LAMPS

FLED43T8FA8/8**/DEBYPASS
FLED43T8R17D/8**/DEBYPASS

Convert any fluorescent fixture quickly and easily with LED linear tubes. The 8' doubled ended bypass series provides unmatched lumen output at only a fraction of the power of traditional fluorescent tubes.

LOW-COST LED CONVERSION
LED lamps allow for the conversion of fluorescent to LED without uninstalling the fixture. Simply remove the existing ballast and enjoy the high efficiency and 50,000 lifespan of LED.

LONG TERM SAVINGS
Bypassing the existing ballast reduces power loss and creates additional value over time. Eliminating the ballast equates to one less part to maintain over the lifetime of the fixture.

FEATURES
• 120-277V AC
• Works direct from line voltage
• Available in both 4000K and 5000K
• 5-year warranty
